                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            уo
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                expression of the nerve growth factor receptor
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Thompson, S.; Grob, P.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   A;Cross-references: GB:M21621; NID:9189206; PIDN:AAA36363.1; PID:9189207
C;Comment: This receptor is found on sensory and sympathetic neurons, on neuroblastoma
C;Comment: The cysteine-rich region of the extracellular domain may form part or all of
C;Comment: This protein is thought to form a high-affinity receptor when it associates
C;Comment: This receptor undergoes both N- and O-linked glycosylation.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    C; Superfamily: nerve growth factor receptor; NGF receptor repeat homology C; Superfamily: nerve growth factor receptor; NGF receptor repeat homology C; Keyvords: duplication; glycoprotein; heterodimer; monomer; phosphoprotein; receptor; E; 12-28/Domain: signal sequence #status predicted <SIG> F; 29-427/Product: nerve growth factor receptor #status experimental <MAT> F; 29-55/Domain: extracellular #status predicted <EXT> F; 32-55/Domain: NGF receptor repeat homology <NG1> F; 57-108/Domain: NGF receptor repeat homology <NG2>

-!- FUNCTION: MAY REGULATE BONE RESORPTION BY BLOCKING TERMINAL STAGES
OF OSTEOCLAST DIFFERENTIATION AND ALLOWING ACCUMULATION OF NEWLY
SYNTHESIZED BONE AND CARTILAGE. MAY INHIBIT IN VITRO
OSTEOCLASTOGENESIS BY INTERUPTING CELL-TO-CELL SIGNALING BETWEEN
STROMAL CELLS AND OSTEOCLAST PROGENITORS.

SwissProt_39:* Database :

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

My Title: A note on the amino acid sequence of residues 381-391 of human immunoglobuli A; Title: A note on the amino acid sequence of residues 381-391 of human immunoglobuli A; Reference number: A93132; MuID:80114419
A; Roccession: A93132
A; Molecule type: protein
A; Residues: 238-275 < HOF>
B; Hofmann, T: Parr, D.M.
Submitted to the Atlas, March 1980
A; Residues: A94591
A; Recidence number: A94591
A; Contents: annotation; Zie, revisions to residues 25, 59, 60, and 264-268
A; Note: the revised sequence differs from that shown in having 60-Ala and in the amid
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Amap position: 14932.33-14932.33
C;Complex: An immunoglobulin heterotetramer subunit consists of two identical light (hain disulfide bonds: In some cases, such as IgA and IgM, the subunits associate into c;Superfamily: Immunoglobulin c region; immunoglobulin homology
C;Keywords: duplication; glycoprotein; heterotetramer; immunoglobulin
F;20-85/Domain: immunoglobulin homology <IM2>
F;33-202/Domain: immunoglobulin homology <IM3>
F;133-202/Domain: immunoglobulin homology <IM3>
F;14/Disulfide bonds: interchain (to light chain) #status experimental
F;17-83,140-200.246-304/Disulfide bonds: interchain (to heavy chain) #status experimental

A;Title: The amino acid sequence of "heavy chain disease" protein ZUC. Structure of A;Reference number: A90198; MUID:77021516
A;Molecule type: protein
A;Residues: 12-97 <MIC>
A;Note: the hinge region in gamma-3 chains is about four times as long as in other
idue segment (12-28)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Ig gamma chain C region - rabbit

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       ò
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Qγ
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Iggamma-3 heavy chain disease proteins - human C;Species: Homo sapiens (man) C;Date: 310-1979 #sequence_revision 23-0c-1981 #text_change 16-Jul-1999 C;Accession: A90442; A90219; A90198; A9315; A02149 R;Franglone, B; Rosenwasser, E; Prelli, F; Franklin, E.C. Biochemistry 19, 4304-4308, 1980 A;Title: Primary structure of human gamma3 immunoglobulin deletion mutant: gamma3 heavy-A;Reference number: A90442; MUDD:81021548 A;Contents: heavy chain disease protein Wis A;Recession: A90442 A;MudD:81021548 A;Recession: A90442 A;MudD:81021548 A;Recession: A90442 A;MudD:81021548 A;Recession: Apole Expansion A;Residues: 1-289 <FRAA A;Note: the molecule is a dimer linked by 12 disulfide bonds; it has an extra interchain A;Note: the sequence of residues 42-76 was taken from the reference that follows R;Michaelsen, T.E.; Frangione, B.; Franklin, E.C. A;Note: the sequence of residues 42-76 was taken from the reference that follows R;Michaelsen, T.E.; Frangione, B.; Franklin, E.C. A;Title: Primary structure of the finge' region of human IgG3. Probable quadruplication A;Reference number: A92219; MUDD:77118661 A;Rocession: A92219
                                                                                                                                                                                                                                                                                                                                                                          C. Genetics:
A. Map position: 14932.33-14932.33
A. Introns: 99/1; 111/1; 221/1
C. Complex: An immunoglobulin heterotetramer subunit consists of two identical light (kap hain disulfide bonds. In some cases, such as IgA and IgM, the subunits associate into la C. Superfamily: immunoglobulin c region; immunoglobulin homology
C. Keywords: duplication; glycoprotein; heterotetramer; immunoglobulin

A/Contents: annotation; disulfide bonds
A/Note: Cys-16 is involved in a heavy-light chain bond
A/Note: Cys-16 is involved in a heavy-light chain bonds
A/Note: Cys-16. Cys-107, and Cys-110 form inter-heavy chain bonds
C;Comment: This chain was isolated from pooled serum of strain 13 inbred
C;Complex: An immunoglobulin heterotetramer subunit consists of two ident cal land ain disulfide bonds. In some cases, such as IgA and IgM, the subunits as ociat

                                                                                                  The sequence is that of fusion protein TNFRFC comprising the extracellular domain of tumour necrosis factor (TNF) fused via a hinge region to the FC part of the heavy chain of human igGl. It may be used as part of a cell free receptor binding test which can be used for the identification of agonists, antagonists, antibodies, biological activity of soluble cellular receptors, functional analysis of modified ligands and diagnostic or therapeutic substances.
